

Mohammad Fahrezi

Full-Stack Web Developer

Cirebon, West Java, Indonesia | HP: 085872381791 | hello@fahrezi.tech | [Portofolio](#) | [LinkedIn](#)

SUMMARY

Informatics Engineering graduate from Sriwijaya University (GPA 3.91) with a focus on full-stack web development and cloud computing. Experienced in building responsive web applications using Next.js, React, and TypeScript, including integrating AI/ML capabilities into digital products. Comfortable handling end-to-end development, from UI/UX design and database optimization to deployment.

RIWAYAT PENDIDIKAN

Sriwijaya University

Bachelor of Informatics Engineering, Faculty of Computer Science | 2022 – 2026

GPA: 3.91

Thesis Research:

“Transformer-Based Sentiment Analysis (IndoBERT) of Gojek User Reviews on the Google Play Store Using 3-Class and 5-Class Classification Schemes”

- Collected more than 66,000 Gojek user reviews through web scraping and performed text cleaning and preprocessing to prepare the dataset for analysis.
- Fine-tuned an IndoBERT-based NLP model and objectively compared its performance across 3-class and 5-class sentiment classification.
- Achieved up to 98.69% accuracy and demonstrated the critical impact of text preprocessing, with model accuracy dropping to 27% when preprocessing was omitted.

SMA Islam Qurani Al Bahjah Cirebon

Science Major | 2019 – 2022

PROJECTS & PORTFOLIO

BonSync — 2026

Personal finance management application featuring OCR-based receipt scanning, automatic expense extraction, and an AI-powered “financial roasting” feature for split bills and spending evaluation.

Technologies: Next.js, TypeScript, Tailwind CSS, OCR API, AI Integration

Website Pesantren Al-Bahjah Buyut — 2026

Modern profile website for an Islamic boarding school with a Student Admission System (PSB), integrated with Google Workspace API and a comprehensive administrator audit log for improved data security and accountability.

Technologies: React, Next.js, TypeScript, Google Workspace API

DiskusiBisnis — 2025

Q&A discussion platform for Indonesian MSMEs, featuring a custom REST API with 66+ endpoints and a Flutter mobile application connected to a centralized database.

Technologies: Next.js, Express.js, TypeScript, PostgreSQL (Supabase), Flutter, Dart, Docker

Modern Web-Based POS — 2025

Point-of-sale system designed for small-to-medium retail businesses, featuring inventory management, real-time calculations, and a touch-friendly user interface.

Technologies: Next.js, Tailwind CSS, React, TypeScript

KreativLabs.id Service Website — 2025

Creative agency landing page designed to showcase services and portfolio projects, with performance optimization and interactive micro-animations.

Technologies: React, Next.js, TypeScript, Tailwind CSS

WORK EXPERIENCE

Full-Stack Developer (Project-Based) - Community Service Program, Sriwijaya University

(February 2026 – Present)

- Developed a Next.js 15 web application and Flutter mobile application, “SiagaBencanaPalembang,” for real-time fire incident reporting.
- Integrated interactive maps using Leaflet with OSRM-based routing, Firebase Cloud Messaging (FCM) for push notifications, and dual-layer authentication with OTP.
- Designed a secure MySQL database architecture with JWT-based authentication and collaborated with the team on requirements analysis and system testing.

Freelance Web Developer - KreatifLabs.id

(November 2025 – Present)

- Developed modern, responsive, and user-friendly websites based on client requirements.
- Designed UI/UX and branding materials to improve user experience and strengthen brand presentation.
- Delivered end-to-end solutions, from UI/UX design and development to deployment.
- Communicated directly with clients to gather requirements, collect feedback, and manage project revisions.

Graphic Designer - PT Tiga Rasa Gemilang

(February 2026 – Present)

- Developed digital visual assets and marketing content to support the company’s digital campaigns and social media presence.
- Collaborated with the Marketing team to maintain brand consistency and align visual content with campaign objectives.

UI/UX Designer - Student Organization Information System, Sriwijaya University

(November 2024 – April 2025)

- Designed user interfaces and user flows for the SIM Ormawa Unsri web portal.
- Created wireframes and interactive dashboard prototypes featuring multi-role approval workflows.
- Conducted user research and prototype testing with students and university administrative staff.

SKILLS

Fullstack Development

- Frontend: React, HTML, CSS, JavaScript, TypeScript, Next.JS, Vue JS
- Backend: Node.js, Express, Flask, Python
- Database: Supabase / PostgreSQL / MySQL / Firebase

Mobile Development (Basic)

- Dart
- Flutter
- Kotlin

Cloud & DevOps

- Google Cloud Platform
- Deployment
- Git

Languages

- Indonesian
- English
